Valid Table

Nonterminal	INT	+	*	(	)	$
E	E -> T E'			E -> T E'		
E'		E' -> + T E'			E' -> ε	E' -> ε
T	T -> F T'			T -> F T'		
T'		T' -> ε	T' -> * F T'		T' -> ε	T' -> ε
F	F -> INT			F -> (E)		

Invalid Table

Nonterminal	INT	+	*	(	)	$
E	E -> T X			E -> T X		
E'		E' -> + T E'			E' -> ε	E' -> ε
T	T -> INT T'			T -> (E) T'		
T'		T' -> ε	T' -> * T T' , T' -> ε		T' -> ε	T' -> ε
X		X -> E' , X -> + INT E'			X -> E'	X -> E'

Активация Windows

This table is invalid because some cells contain more than 1 production. For example, X in terminal + has both X->E’ and X-> + INT E’ which makes it unclear which of those two production rules we should use when we encounter +.
